ABOUT CARGOMAX INTERNATIONAL INC

Cargomax International is a dependable, stable, and innovative company offering global logistics service. We'll keep your business moving by providing international freight forwarding solutions, integrated logistics services, supply chain solutions and much more.

Cargomax was launched in 2001 as a freight forwarder specialising in the Latin American and Caribbean markets. While we started off modestly, we carved out a significant market share in the shipping and handling industry. Today, we have offices, partners and agents in multiple countries with operations that extend around the world, covering Africa, Asia, Australia, Europe, the Americas and Caribbean .

We provide an excellent quality of service delivered by an experienced and dedicated team, making Cargomax International the logistics service provider of choice for top brands in a broad range of industries.

Cargomax International is your reliable, full-service freight solution. We operate globally with an expert team of shipping professionals and state-of-the-art technology. We also offer excellent levels of customer service, treating the goods you ship as if they were our own.

You will find our main services listed on our website, but we offer all our customers a fully customized solution. Even if you have special requirements, we will work out a solution that meets your needs.

The Future

Cargomax International is an ambitious company committed to helping our clients meet the increasing demands of consumers and competitive industries. We constantly invest in our staff, equipment, technology and processes to ensure that we offer best-in-class solutions to our customers in the USA, Canada and around the world.

OUR SERVICES

Our solutions-based approach to providing logistics services will enable you to increase efficiency in your business, expand exports, reduce costs and increase profitability. The solution we provide will be tailored to your needs with reliability and flexibility at the core of the service. We do this by adapting our systems and personnel to ensure that you get a high-quality, specialised solution that meets your specific requirements.

Our approach is to visit your place of operations to get a comprehensive understanding of your needs. In addition, we have the experienced personnel and infrastructure in place to ensure that we exceed your expectations. This includes state-of-the-art technology and cutting-edge logistics processes.

Our expert team, technology, partner network, vehicles, and transportation equipment help us stay ahead of our competition.

List of Services:

- Ocean cargo transportation (ocean container services, RORO service, breakbulk service, heavy cargo, oversized cargo, and more)
- Air cargo transportation
- Road cargo transportation
- Rail and intermodal cargo transportation
- Cargo insurance coverage co-ordination
- Cargo inspection co-ordination
- A complete tracking service with online documentation

We offer specialist logistics services in a range of industries:

- Mining equipment transportation
- Railroad equipment transportation
- Transportation for road equipment
- Transportation for hydro installations and projects
- Transportation of prefabricated housing and building structures, including houses for social project developments, commercial and government installations
- Transportation of medical equipment, including delicate devices that must be handled with care
- Pharmaceutical and healthcare transportation
- Construction equipment transportation
- Agriculture machinery and equipment transportation
- Any other specialised requests

OUR RORO SERVICE – SPECIALIZED FOR ROLLING STOCK

RoRo is a term that is often used to describe a method of transporting vehicles. It stands for Roll on/Roll off, and literally means transporting cargo that will roll onto a ship and then roll off again at the destination. It is used for almost any type of vehicle or machine on wheels, including cars, trucks, trailers, trains, plant machinery and more. In addition, RoRo is available as a method of shipping vehicles in just about every port in the world.

RoRo solutions - when you have cargo on wheels, we offer RoRo transportation solutions. This can include construction vehicles, tractor trucks and trucks in piggy back, trucks and trailers, school buses, city buses, passenger buses, a vintage car, a batch of motorcycles heading for the showroom, a new train car or anything else that moves. Our specially designed vehicle carriers will ensure that your shipment is as safe and secure as possible, and you can easily transport a spare tire and accessories that are fitted to the vehicle. In addition, our RoRo solutions can save you money, as there is no need for lifts or cranes. Instead we use ramps to get your cargo off the transport and on its way to its destination.

OUR SPECIALITIES

Cargomax International offers a full range of freight, transportation and logistics services. Here are some of our main specialties:

- **Ocean freight** - we can ship your goods to ports all over the world reliably, cheaply and quickly. We have built up an extensive network over decades, that enables us to deliver this service, as well as a highly experienced in-house team.
- **Transportation of all types of containers** - whatever size of container you need to transport, and whatever the size of goods or materials you have, we've got the solution. Over the decades, we have shipped containers of every size that has ever been used. Our versatile solutions mean that we'll get your goods to their destination in whatever size or type of container you want to use.
- **RoRo solutions** - when you have cargo on wheels, we offer RoRo transportation solutions. This can include construction vehicles, tractor trucks and trucks in piggy back, trucks and trailers, school buses, city buses, passenger buses, a vintage car, a batch of motorcycles heading for the showroom, a new train car or anything else that moves. Our specially designed vehicle carriers will ensure that your shipment is as safe and secure as possible, and you can easily transport a spare tire and accessories that are fitted to the vehicle. In addition, our RoRo solutions can save you money, as there is no need for lifts or cranes. Instead we use ramps to get your cargo off the transport and on its way to its destination.
- **Over-dimensional cargo** - when your cargo doesn't fit into a pre-defined box or container, we have the solution. We are experts in oversized, overweight, or unusually shaped shipments, regardless of the complexity. This is achieved through a can-do approach, innovative thinking and expert knowledge of the freight industry and the available technologies.
- **Project cargo** - this is the ideal solution if you are working on strict deadlines where there is little margin for error. We are highly experienced at handling irreplaceable items. In each of these scenarios, we have the experience to understand the essential additional processes and steps that must be taken to ensure the cargo is properly protected and delivered as quickly as possible. We do this with a hands-on approach and a full understanding that, while the cargo is in our hands, you depend on us. We work with industry, government institutions, academics, independent organizations and many more. They all trust us to get their cargo to the right destination on time and in one piece, and so can you.
- **Less-Than-Container load (LCL) solutions** - we have extensive experience in dealing with LCL shipments. We keep our prices low by proactively and efficiently combining shipments from various companies to fill up each container we ship. This means you can ship cargo of any size and still benefit from the low prices that are usually only available if you use a full container.
